

## CORPORATE FACT SHEET

- Overview:** MIRATECH delivers emission solutions for natural gas and diesel reciprocating engines used in natural gas production; oil and gas drilling; power generation, rail, marine, and fluid pumping. MIRATECH provides engine exhaust emission solutions for NOx, CO, VOC, Diesel Particulate, HAPs, and noise with products such as NSCR, SCR, and DPF catalysis; silencers; and control systems.
- Corporate Structure:** Privately-held. Headquarters: Tulsa, Oklahoma. Employees and Geographic Reach: MIRATECH employees along with its network of independent Reps and Distributors provide emission solutions to companies in North and South America, and around the globe.
- History:** MIRATECH was established in Tulsa, Oklahoma in 1992 and has grown steadily year after year. MIRATECH sales have increased by offering the right solutions and products at a time of increasing North American concerns about air pollution in cities and regional air basins. Blackouts in the eastern and western United States sparked sales at the company as more and more industrial businesses sought environmentally acceptable new sources of available, reliable and high quality electric power. New product offerings for the rail and marine markets support their operations, while providing cost effective, reliable emission control products.
- Target Markets:** Gas Compression, Power Generation, Rail, Marine, Water Pumping, Air Compression and Drilling Rigs.
- Products:** Non-Selective Catalyst Reduction, Selective Catalyst Reduction, Diesel Particulate Filters, Converter/Silencers, Air/Fuel Control Systems, Technical Field Service, Training, and Permit Assistance.
- Competitive Advantage:**
- Advanced Technology
  - Compliance Assurance
  - Cost-Effective, Comprehensive Solutions
  - Unsurpassed Experience & Expertise
  - Fast, Responsive, Customer-Focused Service & Support:
    - Prevent Non-Compliance Fines
    - Improve Engine & Catalyst Performance
    - Cut Maintenance Costs
    - Maximize Catalyst Life
- Verified Product:**
- Level 3+ C.A.R.B. Verified CBS Diesel Particulate Filter.
- Industry Association Involvement:** Southern Gas Association, Gas Machinery Research Council, American Society of Mechanical Engineers - Internal Combustion Engine Division, Society of Automotive Engineers, Gas Compressor Association, Gas Processors Supplier Organization, Electrical Generating Systems Association and Founding Member of PACE, an industry group that supports the recruitment and training of technicians for the natural gas compression industry.
