MIRATECH Names McAlpine to Inside Sales Position

Tulsa, OK — MIRATECH Corporation, one of the nation's leading designers and manufacturers of emission control products, has announced the appointment of Courtney McAlpine as Power Generation Administrator, an inside sales position.

McAlpine will handle Power Generation sales inquiries, order entry, and coordinate service and training activities with customers.

"Both of my previous positions were peripherally sales-related, offered excellent client interaction, and provided a nice grounding for the work I am doing here at MIRATECH," she says. "I will be fielding inquiries as they apply to our catalyst products for air compression, water pumping, standby, peaking and prime power applications with diesel and natural gas fueled reciprocating engines.

Company President and COO Kevin O'Sullivan says "We are pleased to welcome McAlpine aboard and are confident that she will handle her new position and responsibilities nicely".

"Our Power Generation product line has consistently shown solid growth as new environmental legislation—or changes to existing laws—kick in," says David Zenthoefler, V.P. Sales and Marketing. "Courtney has already shown her ability to provide support for this part of our market and an enthusiasm for seeing it develop. We are happy to have her on the team. "
